Description:

The PLP/2S/DA bulkhead is a robust IP66 luminaire which offers 1316 lumen in mains operation and 1001 lumen emergency operation.

The PLP/2S/DA is manufactured with an opal diffuser which casts the light well. The prismatic diffuser is designed specifically for high ceilings to maximise usefull light at the floor. Ldt files in both mains and emergency operation are available, please contact the Liteplan sales office who will be happy to send them to you.

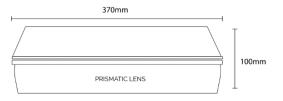

The unit will recharge the batteries after the test of clause 22.3 of BS EN 61347-2-7:2022.

The product features battery temperature protection in accordance with IEC 61347-2-7: 2012+A12:2022.

Important

It is recommended that this product is installed by a competent person in accordance with the current building and wiring regulations. Liteplan accept no responsibility for injury, damage or loss, which may arise as a result of incorrect installation, operation or maintenance.

The product requires an un-switched supply for charging the battery and a switched supply for maintained operation.

MAINS SUPPLIES AND DISCONNECT THE BATTERY BEFORE INSTALLATION OR MAINTENANCE.

Installation:

- 1. Remove the two front screws and lift off diffuser.
- 2. Remove the two screws on the hinged geartray and lift to reveal the components underneath.
- 3. Open your desired cable entry and feed mains cable through. Use the required IP rated gland to ensure that IP rating is maintained.
- 4. Connect the cables to the terminal block as shown in the diagram overleaf.
- For Non-Maintained operation, do not connect to the Switched Live terminal.
- 6. Connect the battery.
- Screw the geartray back into position ensuring no cables are trapped.
- 7. Refit the cover.
- 8. Fit the screws back into the diffiser making a water tight seal.
- 9. Please note that the batter Tc must be above 0 degrees C and below 55 degrees C. Outside of those parameters, the module will not charge the batteries and the green LED will flash red.
